Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statement, filed November 6, 2003, is acknowledged and has been considered.

Claim Objections

2. Claims 2-7 are objected to because of the following informalities: in line 2 of claim 2, “prefabricate” should read “prefabricated”; and in line 2 of claim 7, “connect” should read “connected”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hulsey et al. (U.S. Patent Application Publication No. 2003/0127827).

Hulsey et al. discloses a trailer coupler pivot assembly comprising a pivot mount member (e.g. 20) connected to a trailer frame member (18); a hinge bracket (38) connected to a trailer tongue arm (36), wherein said hinge bracket is pivotally connected to said pivot mount member so that said trailer tongue arm is pivotal relative to said trailer frame member between an open

Art Unit: 3611

position and a closed position, and wherein both said pivot mount member or said hinge bracket comprises a single, prefabricated component as broadly recited, the hinge bracket being pivotally connected to said pivot mount member along a substantially vertical axis so that the trailer tongue arm pivots relative to said trailer frame member between an open position and a closed position through a substantially horizontal plane (see Fig. 2), and having a pair of integral support members (40, 42) having a pivot mount receiving portion therebetween.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hulsey et al.

Hulsey et al. discloses a trailer coupler having all elements as claimed, as recited above in detail, except for specifically disclosing that the hinge bracket and/or pivot mount member is made of either cast or powdered metal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make these frame elements of Hulsey et al. of either cast metal or powdered metal, since it has been held to be within the general skill level of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Allowable Subject Matter

7. Claims 10-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. MacKarvich (U.S. Patent No. 6,595,540 B1), George et al. (U.S. Patent No. 4,073,508), Carson (U.S. Patent No. 2,918,310), Burnett (U.S. Patent No. 2,844,389), Hess (U.S. Patent No. 1,949,962), Adair (U.S. Patent No. 6,527,292 B2), and Moss (U.S. Patent No. 6,460,870 B2) disclose trailer coupler devices having pivotal connections to enable storage of the associated vehicle.
